ABOUT

VALUE FOR LIFE. BUILT ON TRUST.

Unicare is a family-run business that was founded in 1981 by Cyril Pereira and Wendy Leslie Pereira with a focus on Emergency Eye Wash & Safety Showers. Under the leadership of Clint Pereira, Managing Director, the company has expanded to include a diversified product portfolio that includes its manufactured industrial safety products and partner products from the world's leaders in the Firefighting and Search & Rescue segments.

LICENSES & CERTIFICATIONS

Our flagship products are crafted for quality, reliability, and cost-effectiveness, backed by excellent after-sales support. Unicare is a pioneer as the first BIS (IS:10592) licensee and one of the first ISO 9001:2008 certified safety product manufacturers in India, with CE certification and compliance with ANSI and EN specifications.

NATIONAL & INTERNATIONAL STANDARDS

VALUE FOR LIFE. BUILT ON TRUST.

Specifications	 IS 10592:2018 (Reaffirmed Year:2023)	 ANSI Z358.1-2014	EN EN 15154
----------------	---	--	----------------

EYE/ FACE WASH

A	Minimum Water Output	12 LPM	3 GPM (0.4GPM for Eyewash)	Plumbed: 6LPM (EN15154-2)
B	Eyewash nozzle height from standing surface	83-114 cm		1000 mm (+/-200 mm)
C	Eyewash spray pattern		Height between 33" & 53" from standing surface	Height between 100mm & 300mm from the center of the nozzle before arching back down into the eye bath
D	Clearance from wall or any obstruction	15 cm	6"	150 mm

SAFETY SHOWERS

E	Min water flow output	76 LPM	20 US Gallons	Class 1: 30-60 LPM Class 2: >60-100 LPM* Class 3: > 100 LPM
F	Height of column from standing surface	210-240 cm	82-96"	2200 mm (+/- 100 mm)
G	Spray Pattern	150 cm ø at 150 cm height from standing surface	20" ø at height 60" from standing surface	At a distance of 700mm below the shower hard 50% of the water should fall within a 200mm radius circle and 95% of the water should fall within a radius of 400mm
H	Height of pull rod/ actuator from standing surface	Not higher than 175 cm	Not higher than 96"	1750 mm

* Unicare safety showers meet Class II flow requirements by default

GENERAL GUIDELINES

I	Proximity to Hazard	Within 15m from work-place	Within 10 sec reach	Within 10 sec reach
J	Installation Location	Without any obstruction	Without any obstruction and well illuminated	Without any obstruction and well illuminated
K	Temperature of Flushing Fluid	15-37 °C	60-100 °F	15-37 °C
L	Safety Sign		High Visible Safety Sign Needed	Sign as per EN ISO 7010
M	Valve Operation	Within 1 sec Actuation, should remain open without use of hands	Handsfree, Stay Open Actuation within 1 Sec	Stay Open Actuation within 1 Sec
N	Maintenance & Testing	Daily Activation Weekly Water Change for Self Contained Units	Activate once a week Annual Compliance Inspection	Monthly Testing & Documentation
O	Training	Must be Provided	60-100°F	Must be Provided

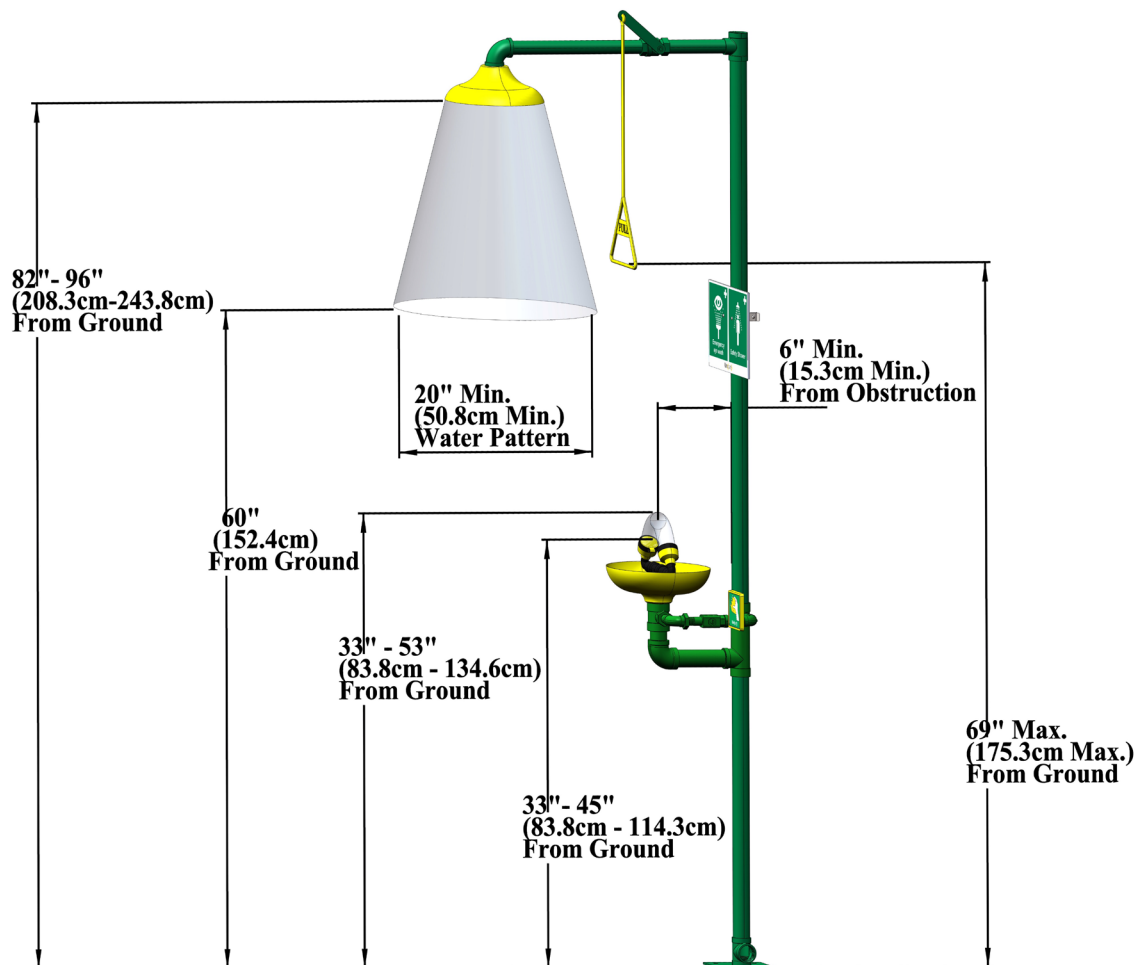

EYE WASH & SAFETY SHOWER

OSHA guidelines 29 CFR 1910.151(c) specifies that –

“Where the eyes or body of any person may be exposed to injurious corrosive material, suitable facilities for quick drenching or flushing of the eyes and body shall be provided within the work area for immediate emergency use.”

General Standard Consideration for Eye/Face Wash & Safety Shower:

- Water: Potable
- Minimum water flow duration: 15 minutes
- Location: Emergency safety equipment should be located within a 10-second reach, at the same level as potential hazards. The installation site should be well-lit, clearly visible, and free from obstructions.

Eye/Face Wash

01. EYE/FACE WASH

GENERAL INFORMATION

Unicare's Emergency Eye/Face Wash is highly reliable. Its cushioned flow and twin atomiser/spray-head design, combined with high-visibility yellow flip-flop/pop-off dust covers that protect the heads from contaminants and automatically open when the eyewash is activated, ensure a gentle, aerated flow of 3 GPM / 12 LPM, providing complete coverage - perfect for the immediate flushing of delicate ocular areas of the eyes and face.

The Eye/Face Wash is activated by hand through a high visibility push plate/handle connected to a ½" stay open valve. The drain is collected in an extra-large receptor bowl (ABS or SS) that is resistant to damage from corrosive fluids.

The flushing fluid is delivered through a schedule 40 pipework which if galvanised is powder coated to safety green for improved corrosion resistance. A very sturdy wall mounting bracket with high visibility strips is provided for robust mounting and is designed to ensure that the flow pattern is at a min 6" / 15.3 cm offset from any obstruction.

A built-in pressure compensator ensures a soothing flow and a unique self-draining feature prevents flushing fluid stagnation after use thus avoiding risk of contamination.

Unicare Eye/Face Wash meets the requirements of **IS 10592, ANSI Z358.1, EN 15154-2, AS 4775.**

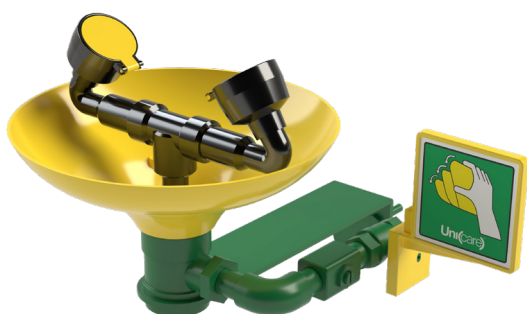

Optional Accessories

- Pedestal Mounting Kit
- Light and Alarm Horn Kit
- Inlet Strainer
- Foot Activation Kit
- Scald / Freeze Protection Valve
- Inlet Pressure Reducing Valve

01. EYE/FACE WASH

PRODUCTS

USE 1 - C2111

Classic Eye/Face Wash with Galvanised Pipes and ABS Eyewash and Bowl

Mounting: Wall

Activation: Hand

Pipe Work: Powder Coated Galvanised

Valves: Brass

Eyewash Nozzle: Chemical Resistant ABS

Bowl: Chemical Resistant ABS

Dust Covers: ABS, Flip Flop

Push Handle: ABS

Inlet: 1/2"

Drain: 1 1/4"

Accessory Included:
Wall Mounting Bracket, Safety Sign, Test Tag

USE 1 - C2114

Classic Eye/Face Wash with Galvanised Pipes, ABS Eyewash and SS Bowl

Mounting: Wall

Activation: Hand

Pipe Work: Powder Coated Galvanised

Valves: Brass

Eyewash Nozzle: Chemical Resistant ABS

Bowl: SS 304

Dust Covers: ABS, Flip Flop

Push Handle: ABS

Inlet: 1/2"

Drain: 1 1/4"

Accessory Included:
Wall Mounting Bracket, Safety Sign, Test Tag

01. EYE/FACE WASH

PRODUCTS

USE 1 - C2444

Classic Eye/Face Wash in Complete SS 304

Mounting: Wall

Activation: Hand

Pipe Work: SS 304

Valves: SS 304

Eyewash Nozzle: SS 304

Bowl: SS 304

Dust Covers: ABS Pop Off

Push Handle: SS 304

Inlet: 1/2"

Drain: 1 1/4"

Accessory Included:
Wall Mounting Bracket, Safety Sign, Test Tag

USE 1 - C2445

Classic Eye/Face Wash in Complete SS 304 with Lid

Mounting: Wall

Activation: Hand

Pipe Work: SS 304

Valves: SS 304

Eyewash Nozzle: SS 304

Bowl: SS 304 with SS 304 Lid

Dust Covers: ABS Pop Off

Push Handle: SS 304

Inlet: 1/2"

Drain: 1 1/4"

Accessory Included:
Wall Mounting Bracket, Safety Sign, Test Tag

01. EYE/FACE WASH

PRODUCTS

USE 1 - C2666

Classic Eye/Face Wash in Complete SS 316

Mounting: Wall

Activation: Hand

Pipe Work: SS 316

Valves: SS 316

Eyewash Nozzle: SS 316

Bowl: SS 316

Dust Covers: ABS Pop Off

Push Handle: SS 316

Inlet: 1/2"

Drain: 1 1/4"

Accessory Included:
Wall Mounting Bracket, Safety Sign, Test Tag

USE 1 - S2110

Slim Eye/Face Wash with Galvanised Pipes and ABS Eyewash

Mounting: Wall

Activation: Hand

Pipe Work: Powder Coated Galvanised

Valves: Brass

Eyewash Nozzle: Chemical Resistant ABS

Bowl: No Bowl

Dust Covers: ABS Flip Flop

Push Handle: ABS

Inlet: 1/2"

Accessory Included:
Wall Mounting Flange, Safety Sign, Test Tag

01. EYE/FACE WASH

PRODUCTS

USE 1 - S2440

Slim Eye/Face Wash in Complete SS304

Mounting: Wall

Activation: Hand

Pipe Work: SS 304

Valves: SS 304

Eyewash Nozzle: SS 304

Bowl: No Bowl

Dust Covers: ABS Pop Off

Push Handle: SS 304

Shower Nozzle: SS 304 **Inlet:** 1/2"

Shower Head: No Shower Head

Accessory Included: Wall Mounting Bracket, Safety Sign, Test Tag

USE 1 - Tc2444

Tough Eye/Face Wash in Complete SS 304, Painted for Extra Protection

Mounting: Wall

Activation: Hand

Pipe Work: SS 304 with Chemical Resistant Paint

Valves: SS 304 with Chemical Resistant Paint

Eyewash Nozzle: SS 304 with Chemical Resistant Paint

Bowl: SS 304 with Chemical Resistant Paint

Dust Covers: ABS Pop Off

Push Handle: SS 304 with Chemical Resistant Paint

Shower Nozzle: SS 304

Shower Head: SS 304 with Chemical Resistant Paint

Inlet: 1/2"

Drain: 1 1/4"

Accessory Included: Wall Mounting Bracket, Safety Sign, Test Tag

Portable Eyewash

02. PORTABLE EYEWASH

SELF CONTAINED

The Self Contained, Gravity-fed Portable Eyewash units provide 15 minutes of continuous flow for flushing the delicate ocular areas of the eyes thus meeting the requirements of safety standards in areas that lack plumbing.

The units are made of chemical resistant plastic. The high visibility container in translucent design makes it easy to judge the water level. Their compact size and a carrying handle allows easy handling. A large filling cap allows easy filling and clear access for weekly cleaning and inspection. The units are provided with a sturdy wall mounting bracket. A simple pull action activates the eyewash.

To avoid bacteria contamination, it is essential to check and change the water regularly or use bacteriostatic solution compliant with local regulations.

Unicare Portable Eyewash meets the requirements of IS 10592, ANSI Z358.1, EN 15154-4, AS 4775

UPEW 14

Portable Eyewash - 34L / 9 Gallons

Capacity: 34L / 9 Gallons

Material: HDPE

Accessories Included: Wall Mounting Bracket

UPEW 15

Portable Eyewash - 56L / 15 Gallons

Capacity: 56L / 15 Gallons

Material: LLDPE

Accessories Included: Wall Mounting Bracket

03. PORTABLE EYEWASH

PRESSURISED

Unicare's Portable Pressurised Eyewash is a two spray head design with flip-flop dust covers. A built-in pressure regulator ensures a controlled flow rate of at least 1.5 litres per minute for 15 minutes. The unit is built on a custom-sized stainless steel trolley with lockable casters for ease of transport and storage.

Designed specifically for areas without access to plumbed potable water, this is a convenient and cost-effective solution for improving compliance and workplace safety.

Additionally, the eyewash is equipped with a non-return valve (NRV), a 0–200 PSI gauge, an air pressure relief valve to prevent over-pressurization, a water level indicator, and a drain.

Unicare Pressurised Eyewash meets the requirements of **IS 10592, ANSI Z358.1, EN 15154-4, AS 4775**

USE 1 - P

Portable Pressurised Eyewash

Water Holding Capacity: 35L / 9 Gallons

Material: Stainless Steel 304

Accessories Included: Pressure Gauge & Relief Valve, Level Dip Stick, Trolley

Water Flow Eyewash (Min): 0.4 GPM / 1.5 LPM

USE 1 - Ps

Portable Pressurised Eyewash with Shower* Attachment

* Pressurised Eyewash with Drench Hose also available

Water Holding Capacity: 50L / 14 Gallons

Material: Stainless Steel 304

Accessories Included: Shower Attachment, Pressure Gauge & Relief Valve, Level Dip Stick, Trolley

Water Flow Eyewash (Min): 0.4 GPM / 1.5 LPM

Drench Shower

04. DRENCH SHOWER

GENERAL INFORMATION

Unicare Safety Showers feature an “extra-large ABS or SS shower head with a perforated spreader” or a “swirl-flow nozzle” that delivers a full 20 GPM / 76 LPM flow when the 1” stay-open valve is activated by a pull rod, ensuring complete drenching of the user within seconds.

The shower head and the swirl-flow shower nozzle are engineered to deliver a flushing fluid column of dia > 20 in (50.8cm) at 60 in (152.4cm) from standing surface.

A built-in flow compensator helps to conserve flushing fluid.

Unicare Drench Showers meet the requirements of **IS 10592, ANSI Z358.1, EN 15154-5*, AS 4775.**

*Special units available for EN15154-1 compliance

Optional Accessories

- Modesty Curtain
- Light and Alarm Horn Kit
- Inlet Strainer
- Walk on Platform
- Scald / Freeze Protection Valve
- Inlet Pressure Reducing Valve

04. DRENCH SHOWER

PRODUCTS

USS 9 - C1111

Classic Pedestal Safety Shower with Galvanised Pipes and ABS Shower

Mounting: Pedestal

Activation: Hand

Pipe Work: Powder Coated Galvanised

Valves: Brass

Shower Nozzle: Chemical Resistant ABS

Shower Head: Chemical Resistant ABS

Pull Rod: Powder Coated Steel

Inlet: 1 1/4"

Accessory Included: Safety Sign, Test Tag

USSW 1 - C2111

Classic Horizontal Safety Shower with Galvanised Pipes, ABS Shower Nozzle & Shower Head

Mounting: Horizontal

Activation: Hand

Pipe Work: Powder Coated Galvanised

Valves: Brass

Shower Nozzle: Chemical Resistant ABS

Shower Head: Chemical Resistant ABS

Pull Rod: Powder Coated Steel

Inlet: 1"

Accessory Included: Safety Sign, Test Tag

04. DRENCH SHOWER

PRODUCTS

USSW 1 - C2114

Classic Horizontal Safety Shower with Galvanised Pipes and SS 304 Shower Head

Mounting: Horizontal

Activation: Hand

Pipe Work: Powder Coated Galvanised

Valves: Brass

Shower Nozzle: Chemical Resistant ABS

Shower Head: SS 304

Pull Rod: Powder Coated Steel

Inlet: 1"

Accessory Included: Safety Sign, Test Tag

USSW 1 - C2414

Classic Horizontal Safety Shower with SS304 Pipes and SS Shower Head

Mounting: Horizontal

Activation: Hand

Pipe Work: SS 304

Valves: SS 304

Shower Nozzle: Chemical Resistant ABS

Shower Head: SS 304

Pull Rod: SS 304

Inlet: 1"

Accessory Included: Safety Sign, Test Tag

04. DRENCH SHOWER

PRODUCTS

Classic Vertical Safety Shower in Stainless Steel

Mounting: Vertical

Activation: Hand

Pipe Work: SS 304

Valves: SS 304

Shower Nozzle: Chemical Resistant ABS

Shower Head: SS 304

Pull Rod: SS 304

Inlet: 1"

Accessory Included: Safety Sign, Test Tag

A high-pressure water spray from a yellow combination eye/face wash and shower nozzle. The water is being directed into a yellow basin, creating a large splash. The background is dark, and the water droplets are captured in mid-air, creating a dynamic and powerful visual effect. The yellow nozzle and basin are the central focus, with the green background providing a strong contrast.

Combination Eye/Face Wash and Shower

05. COMBINATION EYE/FACE WASH AND SHOWER

GENERAL INFORMATION

Unicare's Freestanding Combination Unit combines an Eye/Face Wash with a full-body Drench Shower in a compact design for complete emergency protection.

The eyewash has a cushioned flow, twin atomiser/spray-heads design delivering a gentle, aerated 3 GPM (12 LPM) flow, while the shower provides 20 GPM (76 LPM) for rapid drenching. Built with schedule 40 pipes and fittings, the unit is available in galvanised iron, stainless steel 304, 316, or 316L with or without safety green corrosion-resistant paint. High-impact ABS components withstand chemical damage, and quick-actuation stay-open valves deliver flushing fluid in under one second.

Each unit is 100% hydrotested for reliability. The combination unit is provided with a robust floor flange for secure anchoring to the standing floor high-visibility yellow flip-top covers to keep spray heads debris-free. A built-in pressure compensator maintains soothing flow, and a self-draining eyewash design eliminates risk of stagnant fluid contamination. Ergonomic one-hand activation allows intuitive activation and high-visibility strips ensure quick identification in emergencies.

Unicare's Combination Eye/Face and Showers comply with **IS 10592, ANSI Z358.1, EN 15154-2, EN 15154-5*, and AS 4775**, with eyewash and shower operating independently or simultaneously while meeting all required flow, pressure, and dimensional standards.

*EN 15154-1 and EN 15154-2 compliant units available

Optional Accessories

- Foot Activation Kit
- Modesty Curtain
- Light and Alarm Horn Kit
- Scald / Freeze Protection Valve
- Inlet Strainer
- Inlet Pressure Reducing Valve

05. COMBINATION EYE/FACE WASH AND SHOWER

PRODUCTS

USES 7 - C1111

Classic Combination Unit with Galvanised Pipes and ABS Eyewash/Shower

Mounting: Pedestal

Activation: Hand

Pipe Work: Powder Coated Galvanised

Valves: Brass

Eyewash Nozzle: Chemical Resistant ABS

Bowl: Chemical Resistant ABS

Dust Cover: ABS Flip Off

Push Handle: ABS

Shower Nozzle: Chemical Resistant ABS

Special Products

06. SPECIAL PRODUCTS

SELF CONTAINED TANK SHOWERS

Unicare's Self Contained Tank Shower is suitable for any environment, indoor or outdoor where continuous water supply at all times is not available.

The unit comes with a 1500L tank in FRP or stainless steel mounted on a galvanised or steel structure. To comply with tepid water requirements, the unit can be equipped with a chiller or heater or both.

The gravity-fed eyewash and shower is designed to provide water flow rates that are compliant to the requirement of safety standards. Several instrumentation and mechanical accessories can be integrated for effective functioning of this unit.

Intrinsic safe versions are available for explosion sensitive areas.

Self Contained Tank Showers

Tank Material: FRP / SS 304 / SS316

Tank Frame: SS 304 / SS 316

Tank Capacity: 1500 L

Accessories:

Sump, Ramp, Side Panels, Sun Canopy, Temp Gauge, Level Indicator, Drain Valve, Panic Bar, Chiller & Heater

Instrumentation:

Alarm & Horn, DCS Integration for Level, Temp, Operation

Application:

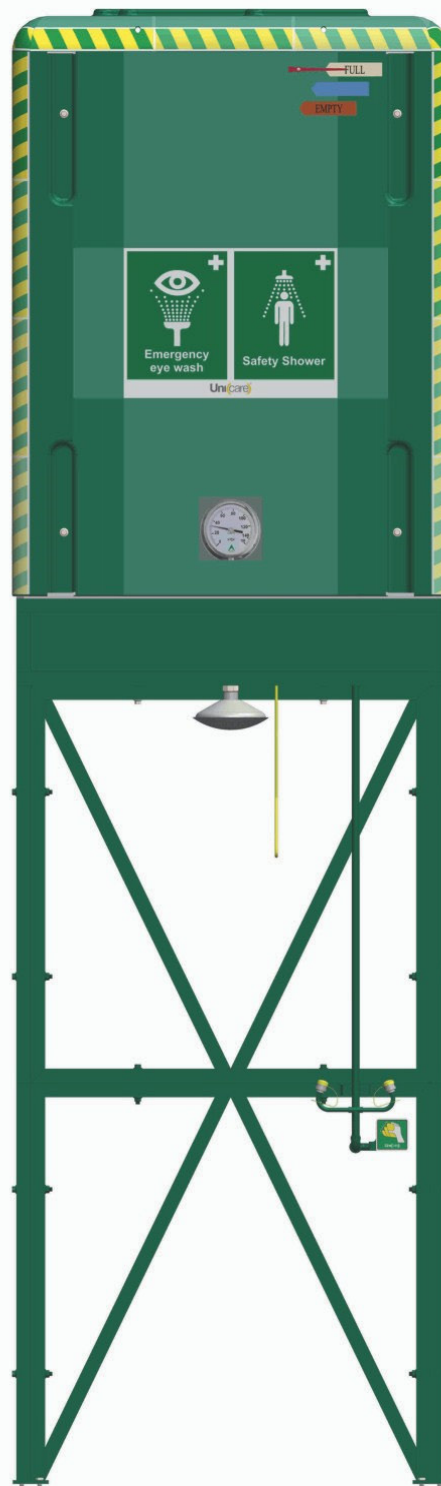

Intrinsic / Explosive Area Compliant, Units Available

Water Flow Eyewash (Min): 0.4 GPM / 1.5LPM

Water Flow Shower: 20 GPM / 76LPM

Approvals: ANSI Z 358.1, EN 15154 - 4, IS 10592

USES 7 C7xxx

06. SPECIAL PRODUCTS

INSULATED SAFETY SHOWERS

The Insulated Combination Showers are ideal for outdoor installations where the unit is exposed to direct sunlight at temperatures more than 35 °C / 95 °F.

The metal pipes are insulated with durable nitrile rubber insulation and encased in preformed ABS covers to minimize exposure to heat and radiation.

Insulated Combination Units for Outdoor Installations in Extremely Hot Weather

Type: Plumbed

Insulation: Nitrile Rubber

Cladding: Pre-formed ABS

Application: Suitable for Showers Installed in Extreme Hot Weather

06. SPECIAL PRODUCTS

HEAT TRACED SAFETY SHOWERS

In outdoor environments with sub-zero temperatures or freezing conditions, Heat Traced Eye/Face Wash and Safety Shower units provide an effective solution to avoid freezing of water.

These units are equipped with thermostat-regulated heating elements in the form of self-limiting heat tracing cables that are wrapped around the internal pipes.

Heat Traced Combination Units

Tank Heating Element: Self-limiting Parallel Resistance Cable with Braided Metal Shield

Temp Control: Preset, Hermetically Sealed (15 - 20 °C/ 60 - 70 °F)

Application: Intrinsic / Explosive Area Compliant Units Available

Application: Suitable for Showers Installed in Extreme Cold Weather, Intrinsic / Explosive Area Compliant Units Available

06. SPECIAL PRODUCTS

ENCLOSED/CABINET SAFETY SHOWERS

Several industrial environments are highly sensitive to spill hazards and at these locations it is essential to minimise water spillage after use of an emergency eyewash/shower.

A safety shower enclosed in a cabinet or a booth is an effective solution for such applications. Any plumbed unit can be mounted inside a cabinet/booth which can be made of galvanised steel or stainless steel or FRP, with or without a drain sump.

A modesty curtain or PVC strips can be added to minimize the spill coming out from the open side.

SS Combination Unit Mounted in SS Cabinet

Pipe work & Valves: SS304

Eyewash & Shower: SS 304

Cabinet: SS 304

Drain Sump: 200L

Inlet: 1 1/4"

Drain: 2 1/2"

Accessory Included: Safety Signs and Sump

Approvals: ANSI Z358.1, EN 15154-5, IS 10592

Galvanised Combination Unit Mounted in Galvanised Steel Cabinet

Pipe work & Valves: Powder Coated Galvanised with Brass Valves

Eyewash & Shower: ABS

Cabinet: Galvanised Iron*

Drain Sump: 200L

Inlet: 1 1/4"

Drain: 2 1/2"

Accessory Included: Safety Signs and Sump

Approvals: ANSI Z358.1, EN 15154-5, IS 10592

FAUCET EYEWASH

The Faucet Mounted Eyewash is a simple screw on attachment to transform a standard sink faucet into an emergency response station without a need for separate plumbing infrastructure or floor space. It features a built-in mechanism that redirects water from faucet to a dual-stream eyewash.

Two dedicated nozzles deliver a soft, balanced, aerated flow of water to both eyes simultaneously. The eyewash heads, fitted with pop-off caps can be aligned individually to avoid spillage and to ensure effective flushing.

The eyewash mode is activated manually by a simple push-pull knob. Once activated, water continues to flow through the eyewash heads until the user switches it off, allowing for uninterrupted rinsing.

These units are intended to be supplementary units and are not a replacement of Eye/Face Wash.

UFEW - 3

Faucet Mounted Eyewash with Handwash Control

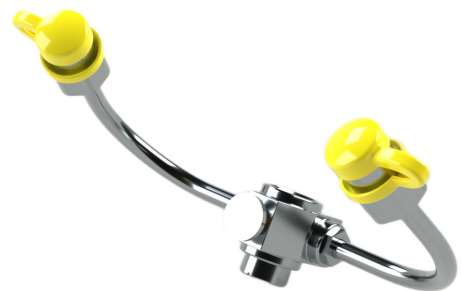

Material: Stainless Steel / Chrome Plated Brass

Eyewash Activation: Push/Pull Knob

Connection: 55/64"- 27 UNS

Design Feature: Integrated Handwash with ON/OFF Knob

UFEW - 3a

Faucet Mounted Eyewash

Material: Stainless Steel / Chrome Plated Brass

Eyewash Activation: Push/Pull Knob

Connection: 55/64"- 27 UNS

Design Feature: Integrated Handwash

06. SPECIAL PRODUCTS

DRENCH HOSE

USE 1C is an ergonomically designed, drench hose ideal for rinsing any body part. A unique 'single nozzle-twin flow' spray head provides a refined flow of 12 LPM/3GPM.

The flow is activated by a simple push button and stays open until intentionally turned off. The unit comes with a wall mounting bracket or deck mounting holder and 245 cm / 8 ft long reinforced PVC hose for durability. These units are intended to be supplementary units and are not a replacement of Eyewash/shower.

In odd cases they may meet the requirements of safety standards when they are mounted correctly and supplied with tepid water.

Local plumbing regulations may require installation of a back-flow prevention valve along with the drench hose.

USE 1C

Drench Hose

Material: Chemical Resistant ABS

Eyewash Activation: Push Knob

Connection: 3/8"

Hose: Reinforced PVC

Hose Length: 245 cm / 8 ft

Design Feature: Single Nozzle-twin Flow
Spray Head.

Water Flow: 12 LPM/3GPM

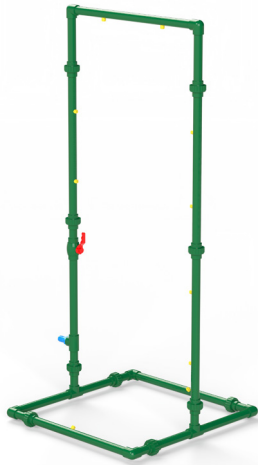

Accessory: Wall/Deck Mounting Bracket

06. SPECIAL PRODUCTS

DECONTAMINATION UNITS

The Decontamination Unit is a complete safety station that immediately discharges copious amounts of water on the whole body of the injured person upon activation through a push plate or walk-on platform. These units are essential in areas where large amounts of chemicals are used, handled and stored or in workplaces where chemical splash hazards exist. They are designed to be located in areas of high hazard where space is limited. They can be mounted against a wall and still leave an open space. Each unit consists of several self-cleaning spray nozzles that provide overall body drenching within seconds.

UPS 1

Portable Decontamination Unit

Activation: Hand

Pipes: PPR

Nozzles: PPR

Water Flow Shower: 110 LPM / 29GPM
